

We are hiring!

Oncobit is a MedTech spin-off from the University of Zurich, developing novel diagnostic and monitoring solutions. Our products are developed with world-leading scientists and physicians to enable personalized cancer care.

Research Associate (100%)

as of November 1st, 2022, or as soon as possible we need support regarding our digital PCR and NGS products.

Your key responsibilities

- You plan, execute and document digital PCR and NGS experiments
- You help to develop, validate, manufacture and service our in vitro diagnostic and monitoring solutions
- You contribute to quality control and regulatory activities (including the compilation of laboratory work instructions and the technical documentation)
- You support activities related to laboratory infrastructure including device maintenance, installation, and repair

Your profile

- MSc or PhD in biology or a related field (PhD strongly preferred)
- At least 2 years of experience in molecular diagnostics, ideally with NGS and digital PCR products
- Good understanding of relevant regulations and guidelines (particularly ISO13485, ISO15189 and EU 2017/746, IVDR)
- Excellent written and spoken German and English skills
- Very high work ethic and excellent communication and organizational skills

Soft skills

- You are a team player and have an entrepreneurial and pragmatic mindset
- You are a quick learner and can manage multiple tasks autonomously and efficiently
- You are diligent, precise, reliable, and committed
- And above all: you are enthusiastic about our mission to enable personalized cancer care!

Our offer

- Possibility of shaping your ideas into real products
- Being part of a team that converts the latest scientific findings into improved diagnostics for cancer patients
- Permanent position in a dynamic, international, and interdisciplinary startup environment

We are looking forward to hearing from you! Please send your CV and motivation letter to: claudia.scheckel@oncobit.com.
